Coming Events

The Ladies Aid of the United Church will hold an Easter Tea on Saturday, April 20th.

The annual School Fair Concert will be held in the U.F.A. Hall on Friday, March 22nd.

The next dance in East Community Hall will be held on Friday, March 29. Good music.

Justice Rebekah Lodge are holding a card party in the Masonic Hall on Monday, March 25. Good prizes for court, whist and bridge. Admission 25c. Everybody invited.

The C. W. L. are holding their annual St. Patrick's tea, sale of home cooking and raffle of a quilt on Saturday, March 23rd from 3 to 6 o'clock in the C.D.S. rooms.

A special meeting of the Floral Local U.F.W.A. will be held in the U.F.A. Hall on Saturday afternoon March 23, at 2.30. All members are requested to attend.

Borbridge - Parsons

The home of Mr. and Mrs. D. H. Parsons tastefully decorated with pink and white streamers and wedding bells was the scene of a pretty wedding on March 12th at 2.30 o'clock when Edna Helen, eldest daughter of Mr. and Mrs. Lake Parsons, of Dog Pound, was united in marriage with Mr. Thomas G. Borbridge, son of Mr. and Mrs. T. J. Borbridge, of Crossfield. The Rev. Mr. Shearer of Carstairs, officiating.

The bride who entered the room on the arm of her father was lovely in a gown of white satin trimmed in rhinestones, carrying a bouquet of Opheelia roses. Her veil which was of silk net was carried by little Edith Morrison, niece of the bridegroom.

Miss Hazel Parsons, sister of the bride was bridesmaid, and was the comely groomed in bluish pink satin. Her bouquet was of pink and white sweet peas.

The bridegroom was attended by his brother, Mr. Kenneth Borbridge. After the ceremony a buffet lunch was served.

Immediately after the reception Mr. and Mrs. Borbridge left on a motor trip, the bride travelling in a motor limo swaggar suit with matching accessories.

Upon their return Mr. and Mrs. Borbridge will reside at his home near Crossfield.

COURTS WRITE "FINIS" IN THE STONE CASE

The Municipal District of Beaver Dam have received word from their solicitor, that the appeal under the paupers act of the Stone Estate against the Municipal District has been refused by the Judicial Committee of the Privy Council.

The case has cost the Municipal District of Beaver Dam in the neighborhood of \$3,000.00, and we should imagine there will be nothing left of the Stone Estate. The lawyers however, have had a good time and will most likely have been well paid for their services. No doubt the widow will have to work out for her living.

M. D. OF ROSEBUD

Meeting of the Council held on March 13th. Councillor A. S. Gough was appointed Reeve and Councillor Geo. Ainscough, Dept. Reeve.

Several applications for seed grain advances were approved subject to lien on crop and land.

It was agreed to offer one cent each for gopher tails to resident school children until 1st May.

Arrangements to be made with druggists at Carstairs and Crossfield for a supply of high grade strychnine for gopher poison at a reasonable price.

R. D. Sutherland was re appointed Sec. Treas., W. A. Pryor, Auditor, E. M. Crisfield, Weed Inspector.

Hospital cases, Old Pensions and other routine business were reported and action taken.

James Petne, Warner, Alberta, was convicted before Magistrate Gordon on Tuesday, of the theft of some cash and a pocket knife from the home of Geo. Kintze. He was convicted of the charge and was allowed to make restitution and pay costs of court or spend 15 days in the Lethbridge jail. He paid.

Alfred Stevens is relieving at Halliday & Co's. Store in Didsbury this week.

Mrs. Wm. Laut

Following a lingering illness Mrs. Bertha Laut, wife of Wm. Laut, passed away at her home in Crossfield, Saturday afternoon March 16.

Mrs. Laut was a prominent figure in our community, coming to Crossfield in 1911. She taught in the school for about two years, active in Red Cross circles during the war, was a member of the School Board at one time, member of the Crossfield Women's Institute, the United Church choir, and the Calgary Empire Loyalists.

Mrs. Laut leaves to mourn her passing her husband, William; one daughter, Wilda; five sisters, Mrs. J. A. Kelso, Edmonton; Mrs. A. Battersby, North Battleford; Mrs. W. M. Henderson, Englefield, Sask.; Mrs. P. McKellar, Muirkirk, Ont.; and Mrs. S. Gillard, Highgate, Ont.; and three brothers, Dr. G. Gessner, Marshall, Mich.; Dr. David G. Gessner, Grimsby, Ont.; and John Gessner, at Highgate, Ont.

Out of regard for the late Mrs. Laut whose funeral took place Monday last, all places of business were closed during the funeral hour. The public service was held in the United Church, being conducted by Rev. E. Longmire, and the Rev. H. Young of Trochu, a former minister of the church. A massed choir led the musical service. Mrs. H. Young of Trochu, and Mr. Gainer of Cochrane were the soloists.

Pallbearers were: Messrs Frank Laut, J. R. Laut, Ian Laut, Weston Laut, Ivor Lewis and G. A. C. Dougan. Interment was made in the local cemetery under the direction of the Armstrong Funeral Home, Calgary.

The attendance at the funeral, the largest ever gathered together in this district, and the profusion of flowers, was a fine tribute to the high esteem in which the family have been held.

Among those from outside points at the funeral were: Mr. and Mrs. Adams, Mr. and Mrs. A. Bracken, Mrs. E. Bishop, Mrs. W. Edwards, Mrs. G. G. Huser, Mrs. J. P. Conrad, Mrs. Valk, Mr. and Mrs. Weston Laut, Miss Maureen Emery, all of Calgary; Mr. and Mrs. Smith, Acme; D. P. McDonald, Cochrane, Mrs. Howard Wright, Airdrie.

Local News

Louis Overby is getting along nicely following a recent operation on his injured leg, and is expected home from the hospital today. It will be at least a month before he will be able to be out and around.

Friends of A. J. O. Cree formerly of the Bank staff here, will be interested to know that he has been moved to Taber. Maurice Wright who relieved at Crossfield a couple of summers ago, takes his place at Drumheller.

Mr. and Mrs. O. E. Jones returned on Thursday last week from an extended auto trip to the U. S. They visited the World's Fair at Chicago, and New York, Detroit, Miami, Florida, and finished up in San Diego, California, where they spent part of the winter. It was a grand trip covering 38 States and four Provinces.

The annual U.F.A. Calico dance held in East Community Hall on Friday was a grand success. The crowd was too large if anything, but nevertheless it takes a big crowd for a good time.

The hall was tastefully decorated and the galaxy of colour, supplied by decorations as well as the many hues of the ladies dresses made a pleasant reaction to the eyes.

The band concert and dance in East Community hall on Wednesday night was very poorly attended owing to the inclement weather. The band played on a record sized concert, and a short play entitled "Jake and the Corpse" given by the Carstairs Wolf Cubs was also greatly enjoyed.

Madden News

The Masquerade dance held in the Madden Hall on Friday last was a grand success. Mrs. Lloyd Havens as an Irish girl won first prize for the best dressed lady. Miss Agnes Ritten as Aunt Jeannine, won the ladies' comic prize. Wm. Kiel, as Uncle Sam was the best dressed gent, and Archie McPhee, representing "Social Credit" romped home with the gent's comic prize.

The Wolf Cubs of Carstairs are holding a Concert at Kenneth Cameron's Hall on Monday, March 25th at 8 o'clock. A feature of the program will be a play—"Jake and the Corpse" There will also be orchestra selections, Scotch dances by Joyce McKay, vocal selections. Admission: Adults 25c, children 10c.

Significant Trends

Whether they believe in them or not, and irrespective of the fact whether they are ardent supporters or skeptical critics, people are deeply interested in the outcome of the various experiments now being tried throughout the world in matters of government, economics and finance. Quite apart from the fact whether or not they are convinced that the old order has, as some contend, broken down beyond all hope of repair and is now definitely and forever passing away, or, on the contrary, still adhere to the view that while changes are taking place, mistakes corrected, abuses eliminated, and improvements made, the old order is essentially sound and will prevail and achieve greater triumphs than ever before, people cannot be indifferent to present day events and the influence which such events are bound to have upon their lives and the times in which they live.

But, as has been noted and commented on many times, we are a credulous people. Of the American people it was said that they thought prohibition, termed a noble experiment, would end liquor and the saloon, and later that they thought the repeal of prohibition would end the bootlegger. Now, under the N.R.A., the United States has embarked upon another experiment, —the business of making rules for business. Rules have been laid down in nearly 500 codes governing 500 industries; and the problem now is how these rules are to be forced. For it has to be recognized that there are many men in every trade who can be counted on to invent devices, as the bootlegger did, for chronic evasion.

As a matter of fact, a small army is now employed across the line in the task of ferreting out evasions and seeking to convict violators of the various N.R.A. codes and thus protect those who are honestly endeavoring to carry out the obligations imposed upon them and their businesses under the New Deal. But notwithstanding all these efforts, a well known authority makes the statement that it is quite safe to say that in the great majority of codes there is no enforcement because any attempt to enforce the rules would lead to abandonment of the code. For this reason there is a strong group in Washington which demands that an immense section of the rules be abandoned. In fact, the proposal is now seriously advanced that codes be applied only to those businesses which do an inter-State business and that they no longer be applied to the smaller concerns which operate more local and restricted to the State within which the business is located. This is a most significant development. It indicates that practical recognition of business has its limitations.

Turning to the Canadian picture, it would appear that much the same thought is entertained by people on this side of the line. The recent voting throughout the three prairie provinces on the proposal to establish a compulsory egg and poultry pool is one indication. The scheme was defeated in Manitoba by a three to one vote, and in neither Saskatchewan nor Alberta was the required two-thirds majority obtained, and in Saskatchewan less than one-half of those entitled to vote even took the trouble to return their ballots, thus indicating either opposition or indifference which amounted to opposition in view of the two-thirds vote requirement to carry.

As a result of this voting, it is announced from Ottawa that the compulsory feature will be dropped from all other proposals for the inauguration of schemes under the National Products Marketing Act, and that while efforts will be continued to further develop the idea of co-operation in support of prices and marketing methods, the plan of making any of these schemes compulsory upon an opposing minority has been definitely abandoned. This, too, is significant in indicating that the Canadian people are not ready to accept either the theories or plans of Co-operation on the one hand or Fascism on the other hand but that they are still firm believers in the ideals and methods of a free democracy.

But, while thus revealing a degree of confidence in the existing order, and a belief that necessary reforms can be brought about to correct the evils and remove the abuses which have developed like barnacles upon it, there can be little doubt but that the minds of the Canadian people are firmly fixed upon achieving these very necessary reforms without loss of time. That is to say, the violators of proper, honest business ethics and methods will be brought to book, made to observe and live up to honest and fair dealing methods, or forced out of business altogether. There is going to be a New Deal, but it will be invoked and enforced by a free democracy.

Hardly Likely

Johnny was reproved by his mother for wasting bread. "You should never throw away bread," she said, "you may want it some day."

"Well," said Johnny, "I would have any better chance of getting it then if I were to eat it now?"

Canadian Aviation

Importance Of Canada As Link In World Air Highways

The importance of Canada as a main link in future world air highways was stressed by Hon. Grote Stirling, minister of national defence, at Montreal, in addressing the annual banquet which closed the two-day convention of the Canadian Flying Club's Association.

With the future of Canadian aviation in mind, the government looked to the C.F.C.A. to take a leading part. The minister regretted his inability to promote in the association further assistance at the present time due to the state of national finances.

He trusted the opportunity would be forthcoming when he could feel justified in putting forward proposals to the cabinet that would enable the government, if they accepted his advice, to provide the assistance the association hoped for.

"A distinct relationship exists between the department of national defence and the Flying Club's Association," he said. The one-time expected clash of interests between the non-permanent flying forces and the flying clubs had never happened. It had been shown the clubs provided the very important task of training young men wishing to gain their commissions in the military aviation service.

COULD NOT SEW A BUTTON ON

Her Hands Were Helpless with Rheumatism

At one time she thought she would lose the use of her right hand. But a blessing—in the form of Kruschen Salts—put her right again.

"I was sure in a sad state," she writes. "In fact, I could not do my housework. I was so bad with rheumatism in my arms and hands, I could not sleep at nights, and I thought I would lose the use of my right hand. I could not hold anything, nor could I sew a button on my arm would go dead. I was advised to try Kruschen, and inside of three weeks I found such a change. I have kept on taking it, and now I sleep all night—thanks to Kruschen's help and relief."—(Mrs. J. H. H.)

Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals, which are responsible for rheumatic agony. Other ingredients of these salts assist Nature to expel these dissolved crystals through the natural channel.

Preparing To Visit London

Advance Bookings Of Cunard White Star Line Indicate May Will Attend Silver Jubilee

Large numbers of Canadians are preparing to visit London for the King's Silver Jubilee celebrations commemorating the reign which began on May 6, 1910, and reaches its 25th anniversary on May 6 of this year, the date to be known as Silver Jubilee Day, according to advance bookings for the first Cunard White Star sailings from Montreal. These are on April 26 when the *Alumina*, *Flymouth*, *Havre* and *London*, and the *Andania* to Glasgow, Belfast and Liverpool will open the St. Lawrence season for this line.

These two sailings are sure to be popular because of the fact that tourist and third class passengers using these two sailings will still be able to take advantage of the special round-trip excursion rates of single fare and one-third which allow 15 days' stay in Europe. This rate is only good until April 30.

World's Fastest Camera

Photographs Flame Travelling At 24,000 Miles An Hour

One of the latest wonders of scientific research is a camera capable of photographing flame travelling at 24,000 miles an hour. The fastest camera in the world, it has just been perfected in London at the Department of Chemical Technology at the Imperial College of Science by R. P. Fraser, an inventor, and his assistant, Dr. W. H. Wheeler. It is called the Fraser High Speed Camera No. 5. It costs about £1,000 to build.

By the new knowledge it will give of the behavior of explosion flames the camera may be the means of saving hundreds of lives.

"I suppose one dresses for dinner here?" the new guest asked the small town hotel keeper.

"Well, suit yourself," sir. But I might add that we charge extra for meals served in bed."

The wholesale business of the United States amounts to \$70,000,000,000 annually. 2099.

ROUGH HANDS? NO!

HINDS restores smoothness which soap and water tasks steal away from your hands

HINDS CREAM

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT (Grapho-Analyst)
(All Rights Reserved)

(Editor's Note: This week's article shows just how graphology can help in solving personal problems. There is a message of hope in it for you, if you are worrying over some personal difficulty. If it is merely a character delineation that you would like, you will find it of immediate value. See the invitation in the following article.)

A letter I received a few days ago from a young lady living in Toronto has given me a good deal of pleasure, and, because it will show just how graphology can be extremely helpful in solving personal problems, I am reproducing it in part, this week. It is as follows:

"Dear Mr. Hibbert: I was reading your article in the paper you advised certain Toronto girls concerning her face. But was the first time I had ever read your column, and, as I read of this other girl's problem, I had the queerest feeling—as if I might have been that 'other girl.' Having read it, I decided right there and then never to see my own boy friend again."

"Knowing where my duty lay, this problem had been worrying me for a long time, but nothing could have driven it home so much and have made me see so clearly that I must and this friendship, for my own good as well as his as your article did."

"As I write this, I feel so grateful to you, Mr. Hibbert, and I want to truly thank you from the bottom of my heart."

"But what kind of a person must I be? Before I met this boy, I thought I knew myself. It's funny, isn't it, how little we really know of ourselves?"

"This young lady, apart from providing the personal value of graphology made another point when she said 'It's funny how little we really know of ourselves.' Not very long ago, a gentleman living in Winnipeg wrote to me asking me to analyse his own writing and that of his wife. He said that the domestic relations were rather strained and both his wife and himself were very unhappy as a result. He added that he believed that his wife was mainly at fault, but he thought to tell him that his wife was doing to wreck the marriage."

Well, I analysed both writings, but instead of having to tell him that his wife was to blame, I had to suggest that he himself was more the guilty party. He said, "You are a dominating person. Not very long ago, I would brook absolutely no interference, and could not tolerate other people's views if they were at odds with his own. In addition to this, he had quite a temper. I could well visualize a scene where he would be laying down the law, and could easily understand the lack of harmony."

The sequel came some time later, when I received another letter from him, to which his wife added a postscript. He had been so shocked by my delineation of his character, that he was beginning to tone it down somewhat, and his wife thanked me for creating a condition which, she believed, would lead to a more harmonious home life.

These instances will show how graphology, by dissecting character, can help a good deal with the problems that worry so many people.

Have you any personal problem that is causing you a lot of concern and worry? Do you wish to know the truth about yourself, and your friends as revealed by your handwriting? Send specimens of the handwriting you wish to be analysed, and enclose 10 cent coin for each. Send birthdate in each case, and enclose with a 3c stamped addressed envelope to Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermid Avenue, Winnipeg, Man. Letters are all confidential and replies will be forwarded as quickly as possible. Some delay is unavoidable owing to the large number of letters coming in.

In a six-hour period, the tide brings in as much water in the Bay of Fundy as falls in the form of rain over the entire United States in a week.

American cotton seed is to be planted, experimentally, on 100,000 acres in China.

Presentation To Scientist

Model Of Buffalo Is Gift Of Winnipeg To Prof. Huxley

A miniature bronze buffalo, modelled after the pair inside the parliament buildings in Winnipeg, was presented to Julian Huxley, distinguished British scientist, at Toronto, as a gift from the people of Winnipeg in appreciation of his lecture tour through the Canadian west.

The presentation was made at the conclusion of Professor Huxley's address. Dr. H. J. Cody, president of the University of Toronto, in a brief complimentary speech, recalled that in 1853, when a department of natural sciences was being formed at the Toronto University, an application for a professorship was received from Thomas Huxley, grandfather of the lecturer, and one of the greatest scientists of the 19th century.

The application was not accepted. But the reason for the rejection was not clear.

Wards Of The Government

Bill Introduced In Ontario Legislature For Protection Of Quintuplets

With the aim of making the Dionne quintuplets "special wards of His Majesty the King, as represented by the minister of public welfare of Ontario," Hon. David A. Croft, minister of finance and municipal affairs, introduced a bill in the Ontario legislature regarding the famous babies of Callander, Ont.

By the bill, cabinet is empowered to appoint a board of guardians with authority over the finances, education and physical well-being of the children.

These "active guardians" will share authority with the father, Oliva Dionne, the "natural guardian," and Dr. Allan Roy Dufor, whether or not the physician is appointed as a guardian, Mr. Croft said.

Life Saving Medals

Officers Of Cunard White Star Line Receive Recognition

Herbert L. Satterlee, president of the Life Saving Benevolent Association of New York, pinned gold medals on Capt. J. C. P. Bisset, R.N.R., and Lieut. Pollitt of the Cunard White Star liner *Ascania*, for the part they played in rescuing the captain and eight of the crew of the *SS. Usworth* in mid-Atlantic on Dec. 14. To the members of the boat crew which performed the rescue Mr. Satterlee presented \$100 to each in cash in addition to a bronze medal. The presentation was made on the deck of the *Ascania*.

Moving Mountain Of Sand

Millions Of Tons Is Burying Forest In Australia

A moving mountain of sand at Cronulla, Australia, has buried a small forest as it slowly advances. Trees 30 to 40 feet high have disappeared beneath the millions of tons of sand. Meanwhile, the sea is eating into land on the ocean side of the "mountain," and every time there is a heavy storm out of a 250-acre government recreation area slips into the Pacific.

The caribou is the only far northern animal of this continent that regularly migrates, although wolves follow the caribou to some extent in winter.

China's Food Problems

Little Arable Land Not Now Being Cultivated

Although China's population has increased by 31 per cent. during the last 60 years, despite famines, floods and civil wars, the area of land actually being farmed neither increased nor decreased during those six decades, according to findings given out by the national agriculture research bureau at Nanking.

The official report declares "too optimistic" the belief China's food shortage and over-population problems can be even partially solved by reclaiming land now not used, or by directing settlement to the open spaces of the great northwest. The survey confirms there is little arable land in China not now being cultivated, and classes the waste places of the northwest as largely unfit for farming.

"So you're married! Did you have a honeymoon, Malinda?"

"Ah suppose ye might call it dat, ma'am—Ephraim done helped me wid de washin' de first week."

Trans-Atlantic Air Mail Is Expected To Serve Empire At About Cost Of Inland Postage

Sir Eric Geddes, chairman of Imperial Airways, said at a Press Club dinner in London that he believed a satisfactory trans-Atlantic air-mail service would be established in a year or two. Arrangements for this service already were being made in Newfoundland, he said.

The possibility of wider and cheaper empire air-mail service was mentioned by Sir Eric. With the help of the post office and the air ministry, he said, "we shall be able to carry air-mail to all the empire at no more cost than the present inland postage."

Arrangements were going forward in Newfoundland, he said, "for the arrival in a year or two of what we believe will be a satisfactory trans-Atlantic mail service and then we shall have practically linked the whole empire." He said new aircraft which Imperial Airways was building with the help of the air ministry were their attempt to solve the long sea crossing with the certainty necessary for a mail route.

The land-locked harbor of St. John's is expected to be used as the Newfoundland base for a projected trans-Atlantic air-mail service forecast in London by Sir Eric Geddes, chairman of Imperial Airways. It is understood the ocean line would be linked up with the Imperial Airways' eastern routes on the other side and with Canadian and American systems on this side.

Oppose British Meat Duty

Australia Objects Strongly To Proposed Levy On Empire Meats
Australia learned definitely that the British government will propose the imposition of a duty of two cents a pound on foreign meat, one cent on Empire meat, and discontinuance of the present quantitative restrictions on meat imports when present arrangements expire at the end of June.

The Commonwealth government is not prepared to agree to such a policy, Dr. Earle Page, deputy prime minister, said. He added it could only be introduced with the concurrence of all Empire countries and thus if objection was raised to any proposal contemplating the imposition of duties, such a proposal could not be put into effect.

Pending the forthcoming conferences in London between ministers of the various governments, it is anticipated that any further arrangements will be of a purely temporary nature designed to tide over the period elapsing before a long-term policy can be agreed on and put into effect.

Simplicity Is Best

Avoid Using A Long Word When Short One Will Do

"In writing and speaking, be simple," says Dean Alford, "be unaffected, be honest in your speaking and writing. Never use a long word when a short one will do, you always lose by using a long one."

"You lose in clearness; you lose in honest expression of your meaning, and in the estimate of all people who are qualified to judge, you lose in reputation of ability. Elegance of language may not be in the power of all of us, but simplicity and straightforwardness are."

Trees As Memorials

A suggestion has been made that throughout the Empire trees be planted to commemorate the King's Silver Jubilee, which is being celebrated this year. Trees are perhaps the most satisfying form of remembrance and though less enduring than stone monuments and more at the mercy of the elements they should last until the story of their planting is lost in the mists of tradition.

Plans are under way to publish a Boy Scout magazine in Brazil, for the steadily increasing number of Scout troops in institutions for blind boys.

American scientists are searching for an elm tree which can resist the dread Dutch elm disease, now destroying thousands of these American trees.

Doctor—"And what are you suffering from?"
Patient—"Head to foot."

The 1935 Grasshopper Situation

Intensive Control Campaign Will Be Necessary In Each Province

That large grasshopper control campaigns will be necessary in each of the prairie provinces during 1935 is the statement of officials of the Entomological Branch, Dominion Department of Agriculture, Ottawa. The situation in Manitoba is expected to be at least as serious, if not more so, than in 1934; that in Saskatchewan will probably be very much less serious, and that in Alberta is expected to be somewhat less extensive and serious than during 1934.

This forecast has been made from egg surveys carried on in the provinces of Manitoba, Saskatchewan and Alberta during the autumn of 1934, by the officers of the Entomological Branch in co-operation with officials of the provincial governments. The surveys included the entire territory likely to be infested. Considering how closely former surveys have anticipated the outbreak of the following year, and the fact that they have been based upon the eggs actually to be found in the ground, there is little question in regard to the substantial accuracy of the forecasts.

In spite of the widespread reduction in the "severely" and "very severely" infested areas, there will still be millions of acres of crop in each province which will require the most thorough and painstaking control measures if the greater proportion of the crop is to be harvested.

Accordingly, large scale and intensive control campaigns will be necessary in each province and the plans for the carrying on of this work, which is regarded of great national economic importance, are already in course of preparation.

The campaign of 1934 was so successful in the savings of millions of bushels of grain and feed that no question will arise in respect to the support which will be given the control work in 1935 by the individual farmers in the infested districts.

Rust-Resistant Wheats

One Of The Greatest Triumphs Of Canadian Agriculture

In two or three years' time the Dominion Department of Agriculture expects to release one or more strains of rust-resistant wheat in substantial quantities. This most important statement cloaks one of the greatest triumphs of Canadian agriculture in overcoming a very destructive disease that attacks cereal crops.

As a result of years of unrelenting effort, co-ordinated by a committee known as the Associate Committee on Field Crop Diseases, strains of rust-resistant wheat, with what is believed will have the yielding ability, baking, milling, and early ripening qualities of such varieties as Marquis, have been developed. The members of this committee are representatives of the Dominion Department of Agriculture, the National Research Council, and the Western Universities and Colleges, and their work, which covers every phase of cereal breeding and pathological researches on rust, smut, foot-rot and other cereal diseases, has progressed with certainty in the face of what seemed to be insuperable difficulties. So that these strains of the new rust-resistant wheat may not be exploited by anyone to his own financial advantage, the distribution of the seeds will be controlled by the Cereal Division of the Dominion Experimental Farms until a sufficient quantity has been developed to enable small lots to be distributed to a large number of farmers.

An Easy Way

There have been a number of cases when cities have tried to deal with slot machines, but there appears to be no definite ruling of wide application. Saskatchewan has simplified things by having the legislature rule slot machines out of the province.

A limestone deposit containing fossils was found by geologists of the Byrd Antarctic Expedition at the head of Thorne Glacier, Queen Maud Mountain Range.

The Finnish Air Defense League has established an annual 750 miles race to be flown by Finnish pilot airplanes manufactured in Finland.

In a twenty-mile journey you pass trucks hauling almost everything but manners. 2090

This Toronto Boy Scout faces a bit of a poser, all right, but he and 3,000 brother Scouts put it across as a real Scouting success when the second annual Scouts' old clothing canvass in Toronto collected for the city's needy 180,000 articles of clothing in addition to many thousands pairs of shoes.

Fast Plane Service In North

Sourdoughs Take To Air In Alaska Gold Rush

Pacific Alaska Airways announced a network of fast flying service over many of the famous old dog-team trails. Planes with cruising speeds of 190 miles an hour will be used, starting this spring.

Sourdoughs can take to the air in this summer's gold rush, for the planes will soar over the vast gold regions of the territory, taking men and machinery in a few hours to points where travel used to require weeks and months.

Two days once were required to go from Juneau to Dawson or White Horse by steamer or rail. One hour is the air schedule. Time between Juneau, the capital city, and Fairbanks, the commercial centre, was slashed from five days to five hours.

For three years, beginning with the king's jubilee this year, Regent Street, London's fashion centre, will be floodlighted every week night.

Milk Better Than Meat

Is More Nutritious According To Findings Of English Doctor

That the protein of milk is of more value for purposes of nutrition than the protein of meat has been proved by a series of experiments conducted in England by Dr. Corry Mann, who reports his findings in an issue of the "Lancet."

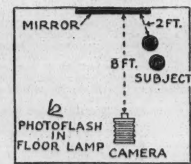

Dr. Mann found that where the total milk intake of the day was reduced from a pint to a half pint there was progressive deterioration in the physical condition, but when a similar reduction in protein effected by omitting some of the meat out of the diet, while maintaining the daily pint of milk, was made, there was no such physical deterioration.

The protein content of milk is not damaged by pasteurization, he declares.

The South Sea Island palm cockatoo blazes when excited; its normally pink face becomes a bright red.

The SNAPSHOT GUILD

CASTING REFLECTIONS

A mirror will bring out that priceless smile of youth.

You may think you have exhausted the supply of picture possibilities in your home but the chances are that there are countless interesting subjects you have completely overlooked.

It is the unusual that attracts attention but it is necessary to use your eyes and a little imagination and ingenuity to ferret out these exceptional views, angles, etc., and get pictures that show individuality.

Mirror pictures, for instance, are intriguing and offer unlimited possibilities if one will do a little experimenting. Let's take the above picture as an example.

When focusing for reflecting images only, it is necessary to add the distance from the mirror to the subject, to the distance from the mirror to the lens of the camera and then set the focus accordingly.

If it is desired to include the subject in the picture with the reflected image the focus should be set for the distance from the mirror to the lens. The smaller the lens opening the greater the depth of field and the sharper will be both images. Of course, the nearer the subject is to the mirror the lens is required in the matter of "depth".

In the picture above, the subjects were about two feet and the camera six feet from the mirror. As both the subject and reflected image were to be included in the picture the focus was set at six feet. The diaphragm was set at f/16 and a photo-flash furnished the light.

If the figures and camera were in a position to show only the re-

flected image in the picture being taken the focus would then have been set at the eight foot distance mark.

The diagram shows position of subjects, camera and photoflash when the above picture was taken. After setting the focus of your camera at the proper distance and the diaphragm at f/16 set the shutter for time exposure.

Do not have any bright lights in the room. Place photoflash lamp in ordinary floor lamp within reaching distance from the camera, as designated in diagram. Be sure to remove the shade from the lamp. Take your position at the camera and caution your subjects not to move. Press the cable release to open your shutter and immediately turn on the photoflash and then quickly close the shutter—and the picture has been taken. Photoflash lamps are made in two sizes, costing 15 and 25 cents each. For this type of picture the 25 cent size should be used.

In amateur photography experimenting becomes the spice of life and you will be surprised at the interesting effects you will get in working out "stunt" pictures on gloomy, rainy days when outdoor activities are taboo. Results in some instances may be rather grotesque but you will have a lot of inexpensive amusement and pictures that show individuality. Anyone can take the ordinary run of pictures but it requires a little ingenuity to get the unusual. That is what you should "shoot" for.

JOHN VAN GUILDER

Prairie Poultry Marketing Plan Fails To Carry Through Majority Vote Lacking Necessary Weight

British Films

More Pictures Of British Production Being Released In United States

The presence of Michael F. Balcon, executive director of Gaumont-British Production, is causing Hollywood to take stock of the British challenge in the motion picture field. In successive years Britain has released pictures in the United States approximately as follows: Four in 1931, 22 in 1932, 23 in 1933, 44 in 1934, and this year the total may reach 60.

London films, which made "The Private Life of Henry VIII," has several pictures about ready, including "One Hundred Years From Now," based on the story by H. G. Wells, and "Congo Raid." Currently finding favor is a Gaumont-British film "The Undiscovered Symphony."

While denying he is here to plan a "war" between British and United States film producers, Balcon admits that "late we have started eyeing the American market more carefully than before."

FASHION FANCIES

801

JANE'S NEWEST FROCK

Ellen Worth offers pattern of this playful blower dress with cunning puff sleeves to show off her chubby arms. Style No. 801 is designed for sizes 2, 4 and 6 years. Size 4 requires 2 1/2 yards of 35 inch material with 1/4 yard of 35 inch contrasting. Pattern 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

The Spring Fashion Magazine is better than ever. Entirely illustrated in color you will find it a very stimulating fashion edition. There are clothes for cruising and clothes to brighten the lives of stay-at-homes. Many delightful little models for the smaller members of the family. Of course, patterns are obtainable for the designs illustrated. Send for your copy to-day, the price is 20 cents.

King's Bodyguard Retires

Has Occupied Responsible Position For Past Forty-Six Years

A man who has "shadowed" the king on every occasion that His Majesty has been out of doors for the past 14 years, retired from his unique job the other day.

He is Superintendent William George Cole, police officer in attendance on the king.

Few people outside court circles have realized that the tall, distinguished-looking man, with greying hair and close-cropped moustache, who has been so constantly but unobtrusively present wherever the king has been, was a police officer.

The king, before leaving for Sandringham conferred the M.V.O. on the superintendent, and, together with the queen, thanked him for his long period of loyal and diligent service.

The superintendent, who is 54, was responsible for supervising all the police arrangements when the king went outside any of his residences.

Owing to his careful planning beforehand, the superintendent has never had to deal with any untoward incidents while in attendance on the king.

Mr. Cole is succeeded by Inspector Harold Green, who for several years has been attached to the queen as police officer.

Poultry producers of Saskatchewan and Alberta voted in favor of a scheme to regulate marketing of poultry and eggs under the Marketing Act, Hon. Robert Weir announced, but the majority was not sufficient to bring the scheme into effect. In Manitoba the scheme was buried under an adverse vote of three to one.

Several schemes under the act have been passed without a poll being taken. In these instances the minister has been convinced there was such unanimity of opinion no vote was necessary. When prairie poultry producers, however, brought forward a scheme, it was recognized there was a wide difference of opinion concerning it. The scheme was altered to meet requirements of the Marketing Act by the Dominion marketing board and preparations made to appeal to producers.

The Dominion government granted \$50,000 to conduct the poll, to be divided \$20,000 for Alberta, \$20,000 for Saskatchewan and \$10,000 for Manitoba. The conduct of the campaign was left to promoters of the scheme in the prairie provinces with the provision whenever polls were held speakers opposed to the scheme should be given an opportunity to speak as well as those favoring it.

Every poultry grower with 25 poultry was allowed to register and vote in his or her post office. The poll was held from Feb. 16 to Feb. 23.

The result of the vote was 62.5 per cent for the scheme in Alberta, 63.4 per cent in Saskatchewan and 24.3 per cent in Manitoba.

"That 94,237 farmers were interested enough in the marketing of their product to vote was in itself very satisfactory," said Mr. Weir.

"Some may protest that the majority in Saskatchewan and Alberta was sufficient to bring in the scheme but I think that would be breaking faith. The literature sent out by supporters of the scheme specified it would not come into effect unless 66 2/3 of the vote was favorable."

"The vote was not on the Marketing Act, it was for and against the particular scheme submitted by the producers themselves," the minister explained.

"I understand those opposing the scheme are preparing to submit another scheme which indicates it was not the principle of regulated marketing they objected to."

One of the chief complaints was said to have been the central selling agency. Many took the view there should be agencies in different parts of the country free to sell to any of the packers or other buyers of eggs and poultry.

Lifeboats Tested On Shore

One Goes To Plant Of Builder Every Trip

Every time the Bremen or the Europa of the North German Lloyd Line arrives in port one of her lifeboats is missing. Each ship carries 25 lifeboats, each of which carries 148 persons, and the thoroughness with which these motor-propelled boats are examined requires more time than is available during the few days the ship stays in port. Therefore, one boat goes to the plant of the builder each trip, and when the vessel gets back to Bremerhaven three weeks later the boat is returned to its place and another is taken off for examination. Each ship is equipped to handle 4,848 persons in lifeboats in case of an emergency that calls for the order to abandon ship.

Facts About The Bible

Over Three Million Letters Contained In The 66 Books

The Bible contains 66 books, of which 39 are in the Old Testament and 27 in the New. The Old Testament has 929 chapters, 33,214 verses, 563,493 words, and 2,728,100 letters. The New Testament has 26 chapters, 23,746 verses, 181,264 words, and 888,380 letters. For the whole bible, the total is 1,189 chapters, 41,173 verses, 774,746 words, and 3,566,420 letters.

With the exception of a narrow coastal strip, Greenland is covered with a coat of ice 3,000 feet thick; the enormous ice cap is about 1,500 miles long and 630 miles wide.

"I wonder who thought of Friday as being an unlucky day?"
"Probably some poor fish."

CENTRAL BANK GOLD RESERVE IS BELIEVED AMPLE

Ottawa.—The Bank of Canada has a gold reserve of \$106,584,355 according to its first statement.

The statement was of assets and liabilities at the end of the first three days operations. The gold reserve is that turned over by the department of finance and chartered banks. It also has silver bullion and sterling and United States funds, bringing total reserves up to \$107,965,585.

Gold backing is well above statutory requirements for note circulation and deposits from the Dominion and from chartered banks which total \$254,223,415. The statute requires a ratio of 25 to 100, the ratio shown was 42.47 to 100.

All issue of notes backed by this gold reserve in future will be in hands of the Central Bank. During the last year the department of finance issued about \$50,000,000 of new money to cover construction operations. This will not be possible in future. If the government wishes to put new money into such operations it must borrow it on securities.

Bank of Canada total paid up capital is \$4,991,640, leaving a balance unpaid of \$8,360. Delinquent shareholders will be given a month to pay the balances.

The bank already has Dominion government securities of \$149,859,930, turned over to it by the department of finance to cover Dominion notes in circulation and the bank starts off with an income from interest on these securities. There were \$185,000,000 in Dominion notes out when the bank started operation.

All For Peace

Ramsay MacDonald Says White Paper Is A Peace Document

London.—Prime Minister Ramsay MacDonald, tired and showing the ravages of the severe cold that has kept him abed the last week, returned to duty to authorize another denial of reports he is about to resign.

Nevertheless, rumors continued that the veteran leader's retirement is likely, with general reconstruction of the cabinet following.

The prime minister presided at the cabinet session and announced vigorously in defence of the "white paper" which he wrote to accompany increased estimates for British defence in 1935.

An old fighter for the cause of peace, the prime minister characterized the "white paper" as a "peace document."

"Peace is written on its forehead; peace is its concluding thought; peace is its purpose throughout."

Despite his physician's orders, MacDonald has been working very hard of late, and this has had its effect. His health is far from that robustness which he hoped last year's Canadian vacation would bring.

May Disband Cadet Schools

Committee of London County Council Will Recommend Step

London.—The education committee of the London county council, of which Labor is now in control, has decided to recommend the council should disband the cadet corps in the secondary schools. The governors of schools which receive aid from the L.C.C. are also to be invited to fall in line.

This step was taken after an intensive debate. The committee held the training of the cadet corps possessed very little educational advantage and was inconsistent with the spirit of peace.

Retiring From Railway Board

Ottawa.—A. D. Cartwright, secretary of the board of railway commissioners, is retiring at the end of this month after 31 years of service. Mr. Cartwright, son of the late Sir Richard Cartwright, minister of trade and commerce in the Laurier government, was the secretary of the original board headed by the late Hon. A. G. Blair. He has held office continuously since then.

Awarded Damages

Calgary.—A jury awarded Fred A. Campbell of Belcher, \$24,585 damages against the Regal Oil and Refining Company of Calgary. Campbell was injured during an explosion at the Belcher plant of the company and sued for \$40,339 damages. He charged the company had been negligent.

Suspension Of Interest

Mayor McGeer Not Asking For Repudiation Of Voucher's Obligation

Victoria.—If the British Columbia government will give Vancouver the same kind of treatment as the province received from the national government, then we will be able to get by without default," Mayor G. G. McGeer told the private bills committee of the legislature.

The mayor was speaking to a proposal that Vancouver be given power to suspend for two years the payment of more than three per cent interest on its bonds.

If the province would give the city an \$800,000 grant as proposed in the report of Thomas Bradshaw, Toronto financial expert, there would be no need to cut the interest, the mayor said.

He declared the city was not asking power to make a final repudiation of its obligation, but merely a suspension which would enable it to get straight within two years.

R. H. Pooley, Unionist, Esquimalt, suggested Mr. McGeer approach the government to pay the excess interest above three per cent and get by that way for one year. Then there would be no question about the city's credit in future borrowings.

"I'd be delighted, if they did that," said the mayor.

West Will Come Back

Says One Good Crop Will Wipe Away Deficits

Toronto.—Premier Gardiner of Saskatchewan told Dominion Mortgage and Investments Association members the arrangements will soon be completed between Saskatchewan and loan companies to provide farmers with seed for the spring.

The fertile soil has not blown away in the west, Mr. Gardiner contended. With one good crop deficits of the past five years could be wiped away and even to-day, if it were not for the mistakes committed in the past, the people could maintain themselves.

Premier Gardiner explained that his mission to the east was to complete negotiations begun last August, and which will, it is hoped, bring about the re-establishment of agriculture in the prairie provinces. In asking for the support of the east, Premier Gardiner mentioned goodwill said, "that is what we want in the west more than just money."

Study Production Tax

Alberta Government Plans New Ways To Obtain Revenue

Edmonton.—Before making its final report, the Alberta tax inquiry board will study a production tax for this province, said Premier R. G. Reid in the budget debate in the legislature.

In view of a number of matters which the government had referred to the board, its final report probably will not be available for some time, he said. An interim report will be submitted to the house shortly.

Referring to new wage or sales taxes proposed or already adopted in other western provinces, the premier said that any suggested levies here would undoubtedly be given careful study by the tax inquiry board.

With statistics, the premier denied the Liberal leader's charge that provincial taxation was causing the confiscation of homes. He showed where provincial revenue from the supplementary revenue tax, for example, had materially decreased since 1921.

Trousers For Unemployed

Ottawa.—A contract for 100,000 yards of drill has been awarded by the government to Dominion Textiles, Limited, of Montreal, according to the House of Commons. The material is to be made into trousers for men employed in government relief camps. Cost of the material, less sales tax, will be \$22,790.

Ontario Premier Threatened

Toronto.—Premier Mitchell F. Hepburn said he has received a threat to blow up his home and buildings in Elgin county before July 12. The premier said the letter was written in long-hand and mailed from St. Thomas. He turned the letter over to Gen. Victor Williams, commissioner of provincial police.

Supporting Fund

Ottawa.—The Mervin, Sask., branch of the Canadian Legion advised the management of the King George V. Silver Jubilee Cancer fund that it was organizing a subscription list of every member of the legion in its zone with the object of raising money for the fund. 2090

Want To Celebrate

Unemployed Of Edmonton Want Cash Donation For Jubilee Festivities

Edmonton.—Edmonton's unemployed want to celebrate the king's jubilee, but they must have the aid of the city's relief department to fulfill their desire.

A petition has been presented to the city council urging the unemployed be given a special gift of 50 cents for every relief recipient "to enable us to celebrate the king's jubilee."

The relief recipients were given \$1 each as a Christmas gift and it was in cash. No action has been taken on the jubilee request.

Heavy Fines For Speeding

British Law Will Be Strictly Enforced In London

London.—The unwary motorist who exceeds 30 miles an hour in London's built-up area is due for an unpleasant surprise.

Plainclothes policemen and police-women in cars will be used to trap speeding drivers. The patrols will cruise at 30 miles an hour. Anyone who overtakes the police car will be signalled to halt by a resounding gong. The penalty for a first offence will not exceed £20 (about \$97) and for a second offence £50 (about \$245).

TARIFF BOARD IS TO INVESTIGATE MOTOR CAR COSTS

Ottawa.—Finance Minister E. N. Rhodes formally authorized Chairman George H. Sedgewick of the tariff board to undertake "at your earliest convenience" an investigation into the automobile industry in Canada, "particularly as regards the bearing thereupon of customs and excise duties or taxes."

The reference is a broad one, embracing "the matter of the relationship of the production of parts to the larger industry, and of both to the general consuming interest."

The action follows a decision reached by the government over a month ago when motor car manufacturers in Canada were advised by Mr. Rhodes that the disparity between the price of cars to the consumer in Canada in contrast with the price of similar cars in the United States was "giving the government grave concern." He then stated the government contemplated taking the necessary steps to remedy the situation.

Stating that in his opinion such an investigation was "in the public interest," Mr. Rhodes instructed the chairman that the inquiry "should have regard for the principles and operations of drawbacks for domestic consumption, as well as for such matters as content and costs of distribution; and it should endeavor to appraise the various factors which determine the prices at which motor vehicles shall be sold at retail in Canada."

FRENCH SCIENTISTS SEE UNUSUAL DEMONSTRATION

Our picture shows Monsieur Lumiere demonstrating what is claimed to be the most practical system of stereoscopic film projection at the Academie des Sciences, Paris. The system is not new and M. Lumiere does not claim in any sense to have invented it. Hitherto, the glasses or screen used, have not contained exactly complementary colors, with the result that the eye quickly tired. M. Lumiere claims to have perfected the glasses so that it is possible to watch stereoscopic films with no strain on the eye.

VANCOUVER'S MAYOR

Mayor G. G. McGeer of Vancouver, who recently appeared before the private bills committee of the British Columbia Legislature to discuss a bill to amend Vancouver's city charter.

Will Allow No Laxity

Penal Sections Of Reform Measure To Be Enforced

Ottawa.—Rigid enforcement of the penal sections of the government's reform measures was promised by Hon. Wesley Gordon, minister of labor. He was addressing a delegation of the Confederation of Catholic Laborers of Canada.

"If there is to be any laxity on behalf of persons or firms which break these laws, the effectiveness of these measures would not only be imperilled, they would be destroyed," he said.

The unemployment insurance, day-of-rest and the eight-hour day bills all have penalty provisions. The question was raised when the delegation asked that companies which break labor laws lose their charters after two offences and that dismissal of a workman because he has joined a union should be considered a misdemeanor. The minister said the complaint applied more provincial than Dominion law, but the reform statutes now before parliament would be vigorously enforced.

Great War Financing

Canada Borrowed \$1,447,138,558 For War Purposes

Ottawa.—From August, 1914, until the demobilization of the Canadian overseas military forces was completed, this country borrowed \$1,447,138,558 for war purposes, Finance Minister E. N. Rhodes told H. E. Spencer (U.F.A., Battle River), in the House of Commons. All of this amount was borrowed in Canada.

Answering a further question the minister said \$1,339,526,528 of bonds were issued free of taxation.

Good Prices For Steers

Calgary.—George Ross, a southern Alberta rancher, has demonstrated the feasibility of feeding steers in the irrigation district of Vauxhall. Ross has completed sale of 500 finished steers to a Chicago packing company at a reported price of \$25,000. Brought in from the range, the steers were "finished" in feeding lots in the Vauxhall district.

Committee To Investigate

Will Suggest Means To Deal With Unemployment Among Veterans

Ottawa.—Unemployment in the ranks of ex-service men will be the subject of investigation by a committee which will recommend to Hon. D. M. Sutherland, minister of pensions and national health, the best means of dealing with this problem.

An order-in-council authorizing the inquiry was passed following representations made by the Canadian Legion.

The committee will consist of Hon. Justice J. D. Hyndman, Ottawa; Col. C. B. Price, Montreal, and W. B. Woods, Toronto.

The committee will carry out an investigation into existing facilities for provision of employment for ex-service men, for their care and maintenance while unemployed, and report with such recommendations as may be deemed advisable.

Ottawa.—The appointment of a committee to investigate the unemployment situation among ex-service men is highly gratifying, resulting as it does from representations made by the Canadian Legion for such action, said Brigadier General Alex. Ross, C.M.G., Dominion president of the legion here.

Demand For Cars

Production In Automobile Plants Shows Increase

Windsor, Ont.—Heavy increases in employment and production, ranging as high as 77 per cent in the former and 100 per cent in the latter for January and February of this year are reported by automotive companies in the Border Cities.

In some instances demand has been so heavy it has been impossible to build up cars for stock purposes. The peak of production is not expected to be reached until another month or so.

SEE FINAL ACT OF THE DRAMA OF GREEK REVOLT

Athens.—Eleutherios Venizelos, leader of the short-lived Greek revolution, took refuge at Rhodes, the tiny island where pirates infested Julius Caesar 2,000 years ago.

Meanwhile the cruiser Averoff, flagship of the rebellion which dropped Venizelos, his Anglo-Greek wife and other rebels at the Italian island of Casos, arrived at Salamis to co-ordinate the government's reconquest of the insurgent fleet.

While the loyalist army continued "mopping up" after routing and rebels in Macedonia, courts martial started grinding away at the grist the 12-day revolt left for them.

Those rebel soldiers who did not flee to neighboring countries probably will be given amnesty, it was indicated, but their officers and those soldiers who joined the movement as volunteers were expected to face military courts.

The Odyssey of the fallen Venizelos, "king" of Greek politics and many times the nation's premier, read like the final act of an ancient Greek drama.

Leaving behind him his native Crete, which reports said he meant to declare independent if the revolt failed, the 71-year-old chieflain fled first to the microscopic island of Casos. Thence Italy moved him to the larger Rhodes, 75 miles away, because it was feared angered Greeks, who constitute the majority of the residents of Casos, might attack him.

The government took into custody Stylianos Gonatas, president of the senate and premier of the revolutionary government in 1922.

Following the example of the rebel military leader, General Panayotopoulos, Colonel Flengas, chief of staff of the seventh revolutionary division, committed suicide to escape capture.

The belief that a mass execution would mark the final chapter of the uprising was widely held in Athens, where it was recalled that a similar fate befell the leaders of Greece's last revolution.

The capital buzzed with talk of the possibility of a monarchist restoration. Crowds cheered and thundered "aito!"—Grecian exclamation of acclaim—when pictures of the late King Constantine appeared on the streets and were circulated hand to hand.

It was understood the government will ask Bulgaria for the extradition of General Kamasos and the other rebels who fled across the frontier.

BRITISH NAVAL ESTIMATES ARE FINALLY PASSED

London.—The British House of Commons voted its approval, 158 to 40, of naval estimates for 1935 amounting to £60,650,000 (\$291,843,000 at par), an increase of £3,500,000 over last year.

The vote came after Sir Bolton Eyre-McNeill, first lord of the admiralty, expressed hope that principle of the Washington treaty in some manner could be perpetuated in order that navies of the great powers may continue regulated by international agreement.

Sir Bolton stressed Britain's desire, to see the size of battleships, cruisers, and their respective guns reduced by joint agreement.

He announced preliminary conversations with other naval powers to prepare the ground for "the approaching naval conference" had been of good service, establishing friendly contact with all delegations.

He emphasized that the United Kingdom could not reduce the number of its naval vessels any further, but was anxious to get a joint international agreement for reduction of the sizes of vessels. Sir Bolton said he thought the maximum for all future cruisers might be fixed at 7,000 tons and their guns limited to 6-inch.

The first lord assailed the Labor party for "trying to make the electorate think this government is a war mongering government," saying this is "the most senseless, groundless and base charge ever made by a political party against its country."

New Series Of Stamps

Six Stamps To Commemorate Silver Jubilee Of King George

Ottawa.—Postmaster-General Arthur Sauve announced his department would commemorate the silver jubilee of King George's accession by issuing a special series of six stamps bearing new designs and portraits.

The denominations and subjects of the issue: one cent, green with a portrait of Princess Elizabeth; two cents, brown with a portrait of the Duke of York; three cents, red with portraits of the king and queen; five cents, blue with a portrait of the Prince of Wales; 10 cents, green with a view of Windsor Castle; 13 cents, blue with a view of the royal yacht "Britannia."

One, two- and five-cent denominations will be regular size stamps. The three-, 10- and 13-cent values will be double size.

Date of issue will be announced later.

Trains Collide

Eleven Persons Injured When Freight And Passenger Trains Met In Blinding Snow Storm

Caradoc, Ont.—Eleven persons were injured here when a Canadian Pacific Railway passenger train and a freight train collided during a blinding snow storm.

Most seriously hurt was Engineer Malcolm D. McTaggart, of London, Ont., in charge of the westbound passenger train, who incurred back injuries in a leap from the locomotive cab when he saw a collision was inevitable.

The other ten suffered shock, cuts, in two cases minor fractures, but were able to continue to their destinations on the next train.

For Service In North

Winnipeg.—One of the largest aeroplanes in Canada, the "Edorado Radium Silver Express" landed here March 12, piloted by W. L. Brinnell, of Mackenzie Air Service. The Belanca air cruiser, capable of carrying 2½ tons of freight, left for Edmonton for service in the north.

Sir John Simon To Visit Berlin

London.—Foreign Secretary Sir John Simon and Lord Privy Seal Eden will leave for their visit to the German government at Berlin on March 24. Sir Simon will return here March 27 after conversations on European security with Chancellor Adolf Hitler.

Porcelain Archives

Jerusalem.—Discovery of porcelain archives 2,500 to 2,600 years old, apparently belonging to the leading prince of Judah, was revealed here. The find was regarded of vast importance as corroboration of Bible stories during the pre-Solomon era.

Atlantic To Be Bridged

Thirty-Hour Crossing By Air Expected In 1937

Europe in thirty hours with comfort and safety! Breakfast in New York and dine tomorrow night in Paris, London or Berlin! A dream? "Far from it," writes Capt. Hugh Duncan Grant in the March issue of *Esquire*. "As a matter of fact, it is a near reality and the early spring of 1937 probably will find trans-Atlantic air mail and passenger service underway over the Seadrome Ocean Airway."

Capt. Grant, who during the World War served as superintendent of the Meteorological Department of the British Navy, is now in America as Meteorological Consultant for the Armstrong Seadromes. He says:

"The breath-taking task of bridging the Atlantic is about to commence; careful plans have been made for early execution. The Atlantic is to be bridged by four seadromes, costing in all no more than the price of a single trans-Atlantic greyhound and anchored 600 miles apart between here and Europe. Three of them will be located between the United States and the Azores and the fourth between the Azores and Ferrol, Spain.

"It is anticipated, on the American side, that the first of these mammoth man-made islands will be anchored about 600 miles out to sea from New York and 500 miles north-northeast from Bermuda by the summer of 1936 and within a year after that, Europe will be but a 30-hour hop from the United States. The fourth, or the European Terminal seadrome, will be placed some 600 miles west of Lisbon between Ferrol and Azores.

"These floating airports, with six acres of unobstructed landing deck and hotel accommodations for passengers who want to break their trip, will be filling stations and safety harbors for Atlantic flyers and will constitute one of the greatest engineering achievements of the century. Impervious to wave motion and equipped with a landing deck anchored upon the high seas, they will permit the landing for refueling of the largest flying boats.

"The seadrome, of which many models have been built and tested, will be a steel and iron open-work structure with a six-acre deck, 100 feet above the water's level and buoyant tanks 40 feet below the water. Ballast chambers, filled with iron ore, will extend 208 feet below the surface, giving it stability. A 1,500-ton reinforced concrete anchor, resting on the bed of the ocean and connected to it by four-inch galvanized standard steel cables will keep it in place, always lying down the wind in position for aircraft to land."

The Least Known State

No European Allowed To Enter Bhutan In India

The ruler of perhaps the least-known state in the world is to pay an official visit to Calcutta, where he will meet the viceroy and be a guest at government house. He is the Maharajah of Bhutan, an independent state on the borders of India and Tibet. No European is permitted to enter Bhutan. There are no roads, railways, telephones or telegrams. But the community is reputed to be a very happy one, with an old and flourishing culture. Bhutanese brass, copper and silver ware, often studied with semi-precious stones, is notable for its fine workmanship. The foreign affairs of Bhutan are controlled by the government of India, and its rulers have for long been on terms of the greatest friendship with Great Britain. The present ruler ascended the throne in 1926, when he was 21 years of age.

Air Derby To Canada

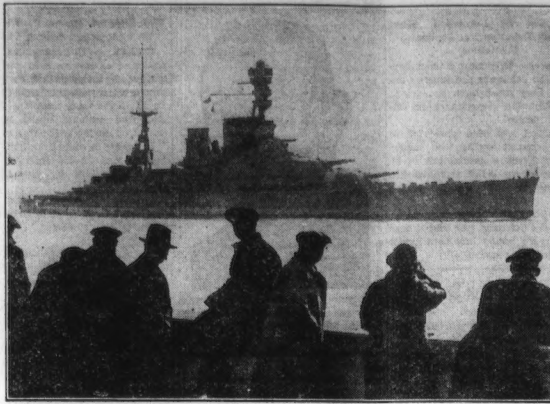

Forging ahead with plans for Vancouver's 1936 jubilee, the committee in charge of arrangements for the celebration has announced a sponsor has been found for a prospective \$25,000 air race from Croydon, England, to Vancouver, via Moscow and Tokyo. His name was not disclosed.

Lots For Your Dollar

A proposed amalgamation of rapid transit lines in New York will enable a passenger to ride 160 miles for a nickel. That's 3,200 miles for a dollar. And that's more than a dollar will buy of anything else of which we have any knowledge to-day, says the Detroit Free Press.

Deterioration of upper leather in shoes, attributed to perspiration, is being studied by Canadian scientists to see how the leather can be made more resistant.

H.M.S. RENOWN RETURNS TO ENGLAND FOR REPAIRS

The British battleship, H.M.S. Renown, is shown arriving at Portsmouth for repairs after her collision last month with H.M.S. Hood off the coast of Spain. As a result of this collision the captain of the Renown was dismissed from his ship following a court-martial.

One Of The Best Of Meats

Use Of Lamb Is Becoming More General In Canadian Homes

In Biblical days lamb, unblemished and of choice quality, was offered up in sacrifice, and even to-day in the Holy Land lamb is the chosen meat for religious feasts.

In Canada lamb was first used as a farm meat in the early days of settlement at logging camps, barn raisings, and other festive gatherings. In those days lamb owed its popularity to the fact that it was fresh-killed, thus possessing all the quality of a high-class farm product. Nowadays, after a hull in popular favour, the fine flavour of lamb is once more being duly appreciated and the use of lamb is becoming more general in Canadian homes. With modern packing-house facilities, with the Dominion Department of Agriculture meat inspection service, and with the sheep industry well organized, choice deliciously flavoured lamb is now available for the retail trade in Canada all the year round.

At this season of the year, a regular supply of freshly-killed carcasses from prairie raised range lambs fattened in feed lots throughout Canada on the best of clover or alfalfa hay and Canadian grains are on display in meat stores and butcher shops. Roasts and chops from these carcasses are tender, carrying a large amount of juicy, lean meat. Dinners served from this meat are particularly appetizing. The satisfaction resulting from the purchase of lamb in any of its many cuts has steadily increased the volume of sales so that to-day an ever increasing number of families are becoming regular users of lamb.

Are Well Represented

Pictures By Royalty Appear At Amateur Art Exhibition

The royal family is well represented at the exhibition of the Royal Amateur Art Society in London. There is a portrait of Princess Louise, a water color of Windsor by Queen Alexandra, sketches by Queen Victoria, and a delightful drawing of a tree and water done by George III, when a boy.

This is on a leaf of a copy-book evidently intended for geometry, for the prince had begun a theorem at the page's top. His daughter, Charlotte, inherited his talent. There are several drawings and some hand-painted china by this lady, who later became queen of Prussia.

Wall-Eyed Pike

Flooding wells on a farm near Camrose, Alberta, periodically emit thousands of small fish which have been identified as wall-eyed pike. They are believed to reach the wells through underground channels from a lake fifteen miles away. It is hardly surprising that they are wall-eyed.

Girl (firmly)—No, I can't marry you. Youth (sneering)—I suppose you'll be telling me you'll be a sister to me. Girl—No, I'm going to be a sister-in-law to you. I'm marrying your brother.

Many Chinese Uneducated

Only three out of every 100 persons living in vast Hunan province, with an estimated population of 56,000,000, are receiving any kind of an education. All the schools combined are educating only 910,580 primary pupils and students.

Corisian Bandit King

Sentenced To The Guillotine For Series Of Murders

Andre Spada, tough bandit king of Corsica, Italy, was recently sentenced to die on the guillotine for murders committed during his reign of terror.

Despite efforts of the defence to paint the outlaw as a 20th century "Robin Hood" who only followed the tradition of the island, the jury took only a few minutes to find him guilty.

Spada's conviction was for the slaying of a young girl he allegedly mistook for one who had spurned his affections. He is accused of five other murders. An appeal was filed.

The conviction was the bandit's fourth, and it was the fourth time he had been sentenced to death. It was the first time, however, he had been present at his trial.

It was only when Spada, who is 30, abandoning of his own will his life in the woods, appeared at a Corsican village wearing a crown of thorns and an air of religious mysticism that the chase ended.

He clung to the religious attitude during his imprisonment, knitting shawls in his jail cell, and stepped out of character only at the trial to heckle witnesses, interrupt testimony to convict him and make faces at the judge.

Synthetic Emeralds

Firm In Germany Producing Them In Small Quantities

The first synthetic emerald has just been produced by the great German Chemical Dye Trust. It has been mounted with genuine emeralds in a ring, and will be the prize in a lottery at the Press Ball, the most outstanding social event of Berlin's winter season.

Called "Igmierals," in compliment to the trust, which is popularly referred to in Germany by the capitals of its name, "I.G.", the stones will only be produced in very small quantities, and possessors of real emeralds are advised that they need have no fear of any fall in value of the authentic gem.

"Do you like school, Tommy?" "Golly, missus! If it wasn't for school we wouldn't get any 'olidays'!"

Explanation Is Simple

Fewer Deaths During Hard Times Because People Get Attention

One of the strangest things about the depression is the fact that the death rate has been falling. When people are going hungry and are unable to pay for medical care, you would expect more of them to die; but, on the contrary, in such a representative territory as the State of New York, the death rate dropped from 124 per 1,000 inhabitants in 1929 to 111 in 1934.

The chief explanation, according to the New York State Health Department, is fairly simple. It is said to lie in "the fact that State and Federal Governments have assumed ever greater responsibility for maintaining of life among the millions of unemployed and their families."

It is a sharp rebuke to our modern society, when you stop to think of it—the fact that so many people get better attention when they are destitute than they do when they are self-supporting.—Quebec Chronicle-Telegraph.

Chapels In A Tree

Oak In France Is Large Enough To Contain Two

The French family of Belloncle has been for centuries "custodian of the key of the oak" and the tree, which this key unlocks still stands in the village of Allouville-Bellefosse, and is large enough to contain two chapels. Nine men's extended arms are barely able to encircle its girth, and botanists estimate its age to be 1,200 years. It was visited in comparatively modern times by Charles II of England and Louis XIV. of France. There are probably many yews in England and elsewhere which exceed this age, however, and the Soma cypress in Lombardy is known to have existed forty years before the first Christmas Day. According to Dean Stanley, there are still eight of the original olive trees standing in the Garden of Gethsemane.

The sea-lily is an animal and not a plant, but it grows at the bottom of the sea and is attached by a long, jointed stem.

Rayon production in Italy continues to increase.

Early Maturing Flax

New Type Developed At Alberta University Has Great Promise

Distribution of seed supplies from the University of Alberta of Redwing flax, a variety that is 10 days earlier than kinds usually sown on the central prairie, where most flax has been raised heretofore, promises "to move the flax-growing area north and to increase production by stabilizing output," according to Dr. O. S. Aamodt, professor of plant breeding at the university.

Five-year test results, both plot and field, showed an average yield of 20½ bushels, almost double the provincial average. Last year, by maturing before the early frost, it was the only variety to grade 1 C.V. of seven under test.

Redwing flax is distinguished by five leading features: Early maturing, highest yielding at Edmonton, stiffest straw, most disease-resistant and highest quality for oil production, said Dr. Aamodt.

The variety was developed in Alberta by Dr. Aamodt from a selection made in Minnesota in 1923 by Dr. E. C. Stakman and himself.

The old idea that flax was harder on the soil than wheat had been proven wrong, said Dr. Aamodt. But as flax required 120 days to mature, consequently, was little raised in central and northern parts of the prairies. Redwing offered a chance to farmers of the north to get more returns. Normally, flax yields two-thirds that of wheat, so should bring 50 per cent. more. The price has been doubled.

There is a market in Medicine Hat mill for more than now produced in Alberta, the professor said, and Canadian production had dropped heavily because it came largely from the dry belt.

World's Largest Clock

Montreal Firm Installing Giant Timepiece With Three Dials

The world's largest clock, with a total dial area nearly seven times as great as London's "Big Ben," is being designed and constructed by a Montreal firm and will be erected next summer at the top of a 50-foot steel tower on the roof of a brewery there.

The giant timepiece will be visible in Montreal and surrounding districts day and night. Brilliantly illuminated with a special Neon lighting system, it will be seen ten miles away at night.

The clock will have three dials facing three ways. The diameter of each face will be 60 feet. The mechanism will weigh about six tons; 9,000 feet of tubing, and several tons of other equipment will be used in making and installing the clock.

The distance on the dial between the minute marks will be 3.14 feet and the space between the hour marks 15 feet. Each of the three minute hands will be 30 feet long from centre to tip and weigh 2,500 pounds. The hour hand will be 20 feet long.

From Small Places

Very Few Outstanding Men Were Supplied By Cities

A great man need not be born in a great place, nor does the biggest city as a rule supply the most of a nation's leaders. Shakespeare came from a small village; Carlyle was the scion of an obscure rural home; the rulers of the nation to-day are mostly the product of the remote towns and the obscure villages. And yet we find young folks often complaining that they cannot make anything out of life because they are compelled to live apart from the crowd. But the pit boy may be nearer the premiership of a great people than even the son of its loftiest lord. A man's significance depends upon himself rather than on either his ancestry or his environment.

Playing Safe

The hotel clerk was growing impatient as the prospect took so long to read the manual on the register. "Just sign on that line, please," said the clerk.

The prospect was indignant and retorted: "Young man, I'm too old a hand to sign anything without reading it."

Jake—A statesman is supposed to be familiar with all public questions. Eli—Yes, but not necessarily with all the answers.

"My uncle left over 500 clocks." "Indeed! It must have taken some time to wind up his estate."

Money makes money—but one has first to make the money that makes the money.

Britain's Defence Budget

Appropriations Shown To Be Lower Than That Of Some Other Nations

Great Britain's defence appropriations for the new fiscal year were completed with naval estimates totaling 600,000,000 (\$291,845,000 at par). This is an increase of £3,500,000 (\$17,010,000) over the naval estimates of 1934. The naval, army and air estimates show an increase of £10,539,000 (\$5,219,540) over the past year, reaching an aggregate of £127,451,000 (\$620,911,560).

Naval defence remains limited by the Washington treaty, despite its abrogation by Japan, until the end of 1936. Consequently the naval building program to be carried out during the coming 12 months remains one of replacement and not of increased construction. The bulk of the increase in expenditure will go for necessary repairs and modernization of capital ships with a view of lengthening their term of effective service.

No new capital ships may be laid down until the Washington treaty expires, and then only in event a substitute treaty permitting new capital ship construction is reached—or no substitute is evolved. Similarly, cruiser forces may not go over the maximum limits of the London naval treaty.

The naval estimates thus differ from the army and air appropriations in that they call for no net increase in fighting craft. But they do provide for an increase of about 2,000 in personnel.

The Singapore base is expected to be completed by the end of the financial year, 1935. A separate paper submitted to the estimates makes no mention of the admiralty's share of generous contributions towards the cost of the base made by the governments of Hong Kong, the Federated Malay States and New Zealand, will be completed by receipt of a final contribution of £72,000 from the New Zealand government.

Increases in Great Britain's defence budget remain below increases in some other nations. Here are some:

United States Budget	Increase
(Proposed)	\$792,000,000
Germany	\$48,000,000
Great Britain	\$20,000,000
France	\$92,000,000
Japan	\$262,000,000
	\$24,000,000

Potatoes Supply Energy

Starch In Potatoes Is In Form That Is Easily Digested

The potato is pre-eminent among the vegetables used for food. Not only does it supply a considerable amount of energy, but it is an easily digestible form. The starch in potatoes is more readily digested than the starch of some other starch-producing foods. However, as the potato is somewhat deficient in protein and fat, it should not be used exclusively in the diet but should be combined with lean meat, legumes, eggs, or other protein or fat-supplying foods.

The method of cooking potatoes has some effect upon the quality and food value. Baked potatoes are most likely to lose in food value during cooking. This loss can be minimized by cooking with the skins on. Baked potatoes lose very little, either in nutrients or in quality when the skins are removed. Potatoes fried in fat are richest in food nutrients. The water is largely extracted and much fat is absorbed. When possible it is best to cook potatoes with their skins on. Cooked potatoes, soaked in water before cooking, often lose as high as seven per cent. of their nutrients.

Made Long Journey

A red, white and blue toy balloon was found in the forest near Uglich, in Courland, Latvia. Attached was a wooden label, inscribed: "Five shillings will be paid to the person who finds this and returns it to Miss Rawlison, Birmingham, Eng. It was released by Miss Rawlison at the People's Carnival in Birmingham, Eng."

Clergyman (to father who has just had his baby christened "Homer")—I suppose Homer is your favorite poet?

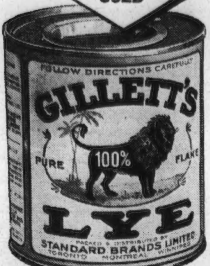

Farmer—Poet? No, sir! I keep pigeons.

Toronto has a magistrate who permanently cancels the licenses of autoists convicted of reckless driving. He says apologetic penalties are useless.

I FLEW OFF THE HANDLE AT STOPPED-UP DRAINS

UNTIL I USED

It cuts right through all clogging matter...

There's nothing like Gillett's Pure Flake Lye to clear drains in a jiffy! Use it regularly and you'll keep sinks, tubs and toilets running freely. Pour it down full strength

—it will not harm enamel or plumbing. Kills germs and destroys odors as it cleans. Keep a tin on hand.

Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—The Gillett's Lye Booklet gives dozens of practical hints for using this powerful cleanser and disinfectant. Also gives full directions for seaming, thorough cleaning and other uses on the farm. Write for free copy to Standard Brands Limited, Fraser Ave., and Liberty St., Toronto, Ontario.

GILLETT'S LYE EATS DIRT

THE TENDERFOOT

By GEORGE B. RODNEY

Author of "The Coronado Trail," "The Canyon Trail," Etc.

SYNOPSIS

"You've fallen here to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

Dad Keene, desert rat and luckless prospector till now returns to tell Dustin and Spike Goddard, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore.

Dustin unexpectedly comes along while Stone and Edith are riding fence, and seeing them, stops and talks to Edith. He mentions their dispute could be settled by marrying him, and Edith refuses his proposal with remarks that make Dustin furious. He insults Stone, who promptly throws him into a pool of water. Dustin learns that Gerald Keene has been sent for, and also that Duro Stone has seen the Broken Spur men rustling Carr's cattle. He sets out with Dad Keene to learn the location of his gold discovery. Dad Keene shows Dustin the mine.

(Now Go On With The Story)

CHAPTER XIV.—Continued

"We sure did. And on the way home, when Dustin tried to ride me down in the golpe de caballo, I upset him and I went through his pockets. I found in his pocketbook a note for eleven thousand borrowed on the Hour-glass that he got from Mr. Pegram. Pegram told the note to Dustin. That's how things stand."

"Uh-huh. And that means that if Dustin sees out the note, he'll have Joe's share of the Hour-glass. Joe can't meet that note right now, you know."

Again Stone nodded. "And that means, of course," said Carr moodily, "that Dustin can ruin Joe. Joe's past sixty right now. He only knows cattle. This is his last stake. You know Edith right good. If she ever gets the idea into her head that you're marrying Dustin, she can save her father, she's damned likely to do it. She'd even marry that dirty hound Dustin to save Joe."

"You forget one thing... two things... That ore may be what I'll take a year to get even a hundred per cent. mine to workin'," said Carr. "There'll be a lawsuit first over it."

"We'll find that man Kane," said Stone confidently. "And, too, Gerald Keene'll be in to-morrow night. Something'll turn up."

"By Heavens, that's so. If this Gerald Keene is his uncle, he'll never see old Joe shoved to the wall. I'm goin' in to Seco to meet him to-morrow. I've got to go to the bank to try to raise money for our payroll. Nine hundred dollars. You better go with me."

"I'd like to see you stop me. I'm for the bunkhouse now." And Stone strode back toward the house.

Halfway to the bunk-house where he was stopped by Edith. For a moment she regarded him wordlessly. Her lips were unsmiling, but there was a light in her eyes that he had never seen but once.

"What has happened?" she asked breathlessly. "Not much. I told Jameson of the Seco paper about the ore and he will have Buxton give an expert opinion on it. The most important thing is that he's tryin' to find Kane."

"That can't help much," she said. "My one hope is in Daddy's new partner, Mr. Keene. He may be able to help us if he will. Do you know what that beast Dustin said to Daddy...?" She told him pretty much what Carr had already said.

"Of course he wants to marry you," he said curtly. "Who in his senses wouldn't?" "And at a sudden light in his eyes, he gave back a little and her laugh was a little strained. "The fool... The utter fool to think that he can buy a girl like you..."

"What do you mean by that? Buy me?"

For one brief minute he could not decide whether to tell her or not... Then he told. Her eyes widened as

she listened and when he stopped, she laid a hand gently on his arm.

"I'm glad you told me this," she said quickly. "I knew Daddy had borrowed some money but I did not know from whom he got it..."

"Your father doesn't yet know that Dustin holds the note," he said. "You'd better not tell him that yet. Wait till Keene gets here."

"I will be careful. I am glad to know the worst at least. I know at least where the thunder will come from."

"You will not even consider marrying that man Dustin, will you?"

"Would you drink poison if you were thirsty and if you knew it was poison?" she countered. "Good night." But her eyes told him untellable things.

Carr drew him aside after dinner the next day. "Damn it all," he said. "Old Joe insists on goin' in to Seco with us. I tried to head him off. If he goes to the bank to get the money for the payroll, he may find out about that note. It's sure to come up. If he finds that Pegram sold his note to Dustin, he'll likely go on the prod."

Even Edith could not keep her father at home. During that drive he was cranky and querulous, and Stone sensed this. "Go straight to the bank..." Carr's usually pleasant voice was a snarl.

Stone headed the car for the bank and stopped under a tree and Carr, with Carr at his heels, strode into the bank. Peters, seeing them enter, ducked into his cage, and old Pegram, his faced flushed to a dusky tone, dived like a rabbit for his private office. The next moment Joe Carr burst into the room. A sudden babel of raised voices swung out of the empty bank.

"Good Lord," muttered Stone. "The fat's probably in the fire by now. I wonder if I had better have told him about that note of his that Dustin holds."

He was dimly aware that the centre of the trouble had drifted into Pegram's private office. One or two men in the street, hearing the voices raised in anger, stopped, grinned significantly and went on up the street. It was no new thing in Seco to have a sudden war start in Pegram's office. Suddenly old Joe Carr shot out of the place. His very beard was curling with wrath and his eyes were blazing. He stumbled into the car and Carr pitched in beside him.

"Take it easy, Joe," he said in a low tone. "No need to let all Seco know your affairs. Take it easy, I tell you. Did you get the cash for the payroll?"

"Oh, that! Yes. I got that on a thirty-day note for fifteen per cent..." He laughed merrily. "Do you know what that damned dog Pegram has done?" he said in a low, tense tone. "He held my note for eleven thousand secured by the half of the Hour-glass. Damned if he hasn't sold the note..."

"To Dustin, of all men! That's why that damned cur had the nerve to come to me to tell me he wants to marry Edith."

His face suffused with blood and his breath drew hard.

"I told Pegram I'd settle that note up on time."

"So I will, just as soon as I can make arrangements with Gerald Keene, my partner. Damn it all!

He'll buy the ranch from me if I say the word. How do I know? Hell, man! I've told this Gerald Keene old Peter Vinton's kin? Wouldn't I have done the same for old Peter?"

And Frank Crewe, who knew that Joe was speaking the plain, unvarnished truth, said nothing. Carr snatched out his watch and glanced at it.

"We've got time to get a drink at the Silver Dollar before we meet the train," he snapped.

"We don't want anything to drink," expostulated Stone. "It's late now. The only reason you got into the bank was because it's open after hours."

Carr glared at him. For an employee to give him any back-talk was unheard of but... He reflected that this man Stone was a close friend of this Gerald Keene, and this man Keene was an unknown quantity.

"You go to hell, son," he said with heavy pleasantry. "You do as you're told. Drive to the Silver Dollar."

Stone glanced at Carr and a quick nod reassured him. He stopped the car before the Silver Dollar and stayed in the car while Carr, with Carr behind him, entered the place. A moment later a hand was laid on his arm and Jameson stopped by him.

"I got some news for you, Stone," he said briefly. "I took care over it. Buxton. He's about crazy over it. He's says it's 'ham boiled in champagne'."

"You know what an assayer means when he says that? He kept it for me for an hour askin' where it comes from and if there is much of it. I stalled him off. By the way of... How did that big sample get covered with blood?"

"Big sample?... Stone stared at him. "Blood?... What are you talking about, Jameson?"

"I'm talkin' about that biggest sample that you brought in. You had it in your coat pocket. Did you have a fight?"

"No. I don't understand. I seem to remember that I did notice a dark stain on it when I picked it up... By the way, I got that ore specimen from the place where the camp-fire was. That's probably where the blood came from. Have you succeeded in finding old man Kane yet?"

"No. No one has seen him for some time. They tell me he was being grub-staked by Dustin at the Broken Spur. That's what you said, too. I mean have to see Dustin. It's barely possible that that old fool Pegram may be able to give us some information about Kane. I saw him heading for the station a while ago. He's all hopped up, as usual. I reckon I'd better wait till he gets a clear head before I tackle him for straight talk."

(To Be Continued)

Canada's Home Markets

Canada's home markets absorb approximately 85 per cent of Canadian farm produce according to Dominion government estimates. The home market has come to be almost the sole outlet for animal products, with the exception of bacon, and there are only three products—wheat, apples, and cheese—of which more than 50 per cent is exported.

Approximately \$500,000,000 worth of old gold was brought to light in England's recent search for the precious metal.

Jubilee Services

Special Prayer Written For Occasion By Archbishop of Canterbury

Church services throughout the British Empire will be marked by the singing of the national anthem during the celebration of the royal jubilee, it was announced in London.

It was also announced a special prayer had been written for the occasion by the Archbishop of Canterbury and would be said in all English churches.

Text of prayer: "It is very meet, right, and our bounden duty, that we should give thanks unto Thee, O Lord, holy Father, almighty, everlasting God, for that Thou wast pleased, as on this day, to set Thy servant, our sovereign lord, King George, upon the throne of this realm and hath profited him, in days of sickness and of health, throughout his reign of fifty, twenty years. For the example of unceasing service set by him and our gracious Queen Mary, for the loyalty borne to him by the great family of peoples and in all parts of the world, we magnify Thy glorious name."

Bank Borrowers

Financial Institutions Were Heaviest Borrowers In 1934 From Chartered Banks

Financial institutions and operators were the heaviest borrowers from chartered banks of Canada, according to a statutory return as of Oct. 31, 1934, made public by Finance Minister E. N. Rhodes.

Total loans to financial houses, including brokers' and bond dealers' call loans, trust, mortgage and investment house loans, and loans to individuals against approved stocks and bond, totalled \$275,897,430.

The mining industry was the lowest borrower, with \$6,632,120. Total loans of all classifications on that date were \$1,149,708,830.

Agriculture ran second to finance in the classification, borrowing \$214,745,049, of which \$64,229,743 went to farmers, cattle raisers and fruit growers, and \$150,515,305 to grain dealers and exporters and seed merchants.

Health Rules Drawn Up

To Lessen Danger Of Transporting Disease By Air

A set of rules designed to minimize the danger of disease propagation by aircraft, moving from one country to another has been drawn up by the International Sanitary Convention for Air Navigation.

Great Britain is one of the 23 countries which have agreed to the rules, although British Empire lines are considered practically immune because of the repeated changes from one type of airplane to another en route.

The rules relate chiefly to the provision at Customs airfields of means for inspection, and, if necessary, for suggestion.

Had The Information

Lieut. Alfred Hernandez of the Chilean police was the most astonished man in London when he was there to study British police methods. He had long sought a rare book on occultism. In vain he looked for it in the United States and on the European continent. In desperation he asked a London "Bobby" in Regent street. Hernandez nearly collapsed. The "Bobby" told him the proper title, the price and the name of the publisher.

In ten years the United States has imported six million dollars worth of radium—less than one-third of a pound.

People are returning to what they once believed, that nothing can be had without work.

FOR FAST RELIEF FROM PAIN

All Druggists Have It

An Aspirin tablet starts disintegrating as soon as it touches moisture. That means that Aspirin starts "taking hold"... eases even a bad headache, neuralgia or rheumatic pain almost instantly. And Aspirin is safe. Doctors prescribe it. For Aspirin does not harm the heart.

Be sure to look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is made in Canada and all druggists have it.

Little Helps For This Week

"Therefore my beloved brethren be ye steadfast, unmovable, always abounding in the work of the Lord, forasmuch as ye know that your labor is not in vain in the Lord. I. Corinthians 15:58.

Say not, 'Twas all in vain. The anguish and the darkness and the strife: Love thrown upon the waters comes again as a cross on every nobler life.

Did you ever hear of a man who, had striven all his life faithfully and singly toward an object and in no measure obtained it? If a man constantly aspires, is he not elevated? Did ever a man try truth, heroism, sincerity of magnanimity, and find there was no advantage in them, or that it was a vain endeavor?

Do right, and God's recompense to you will be the power of doing more right. Give, and God's reward to you will be the spirit of giving more, a blessed spirit for it is the spirit of God himself, whose life is the blessedness of giving. Love, and God will repay you with the capacity of more love, for love is heaven, love is God within you.

Success comes to those who make up their minds to do a thing—and then do it.

Approximately 2,270,000 square miles, or two-fifths of South America, is drained by the Amazon river.

FALSE TEETH

DR. WERNER'S POWDER HOLDS FAST

When this denture's grand prize is held in place, it holds firmly, snugly and comfortably in place. Has the largest sale in the world—there's a reason—ask your dentist—his practice is better evidence across—less expensive.

PATENTS

A List Of "Wanted Inventions" and Full Information Sent Free On Request. The RAMSAY CO. Dept. 873 BANK ST. OTTAWA, ONT.

Nervousness, dizzy spells, tiredness, headaches...

Get rid of them this safe, natural and inexpensive way

Now you can banish constipation without the use of costly, habit-forming drugs. Doctors advise Quaker Bran—the natural coating of the wheat. Let it work with nature to promote normal, healthy bowel movement.

Remember, Quaker Bran is different from all prepared bran cereals. It's pure bran, uncooked—untreated—undiluted.

QUAKER BRAN

Pure, Natural, packaged bran.

Local News

Crossfield Local Chautauqua—Thursday and Friday, April 4 and 5. "Laughing" Dick Nichol is with us again after a sojourn at Elnora. Mr. and Mrs. Ed. Clark of Calgary were visitors in town Monday. The road graders commenced work on the highway this week. Dr. S. H. McClelland is confined to his home with a severe cold.

Airdrie's annual Community Sale will be held on Thursday, Mar. 28. Remember the C. W. L. tea and sale of home cooking on Saturday. Better take a chance on that tire Bill Wood is giving away. Read his ad. on the front page.

The weather has been cold here of late, with light snow flurries and the usual March winds.

R. M. McCool, M.L.A. spent the week-end in town, returning to Edmonton on Monday night.

Harry Kinney who has been wintering in Calgary, has returned to town.

The curling rink has closed for the season and the rocks removed to the fire hall on Tuesday.

John Low is having a machine shed and garage built on his farm north of town.

Clarence Casey had the misfortune to run a nail in his foot on Tuesday and it is laid up.

Rev. H. C. Phillips of Drumheller, is conducting special services at the Baptist Church each evening this week.

Chas. Mayman and Stanley Reid attended the Alberta Amateur Boxing Championships at the Memorial Hall, Calgary, on Tuesday night.

Rev. and Mrs. H. Young and Marjorie Young came over from Trochu to attend the funeral of the late Mrs. Laut on Monday.

Mr. and Mrs. George Whitfield, and Mrs. Robt. Whitfield of Airdrie who were visiting friends in town last week, returned home Sunday.

The many friends of Mrs. Geo. Murdoch will regret to know that she has been sick in bed for the past week.

The many friends of "Dad" Halliday will regret to know that he is confined to his home through illness.

BORN—To Mr. and Mrs. W.M. Reeves of Bottrel, on March 16th, a daughter, at Mrs. Collins Nursing Home.

Miss Alma Gordon accompanied Miss Marjorie Young to Trochu on Wednesday, where she will visit for a time.

Mrs. J. R. Laut returned on Saturday after spending a month with her daughter and son-in-law Mr. and Mrs. L. J. Smith of Rocky Mountain House.

Mr. and Mrs. Wm. Brooks and Mrs. Huser, sr. came up from Calgary on Friday last to attend the U.F.W.A. calico dance.

Mr. and Mrs. C. H. McMillan and children were the guests of Justice and Mrs. Clarke at Calgary on Sunday.

We understand that Mr. Halliday is going to clear out his entire stock of gent's furnishings. Sid Willis of Didsbury is here taking stock and preparing for the sale.

The 25th anniversary of the Crossfield Masonic Lodge which was to have been celebrated in April has been postponed until fall.

The Community Sale held on Monday was not very successful. The crowd was large but buyers were scarce and most of the goods did not sell.

The young people of the Crossfield, Airdrie and Dog Pound districts are entertaining the newlyweds, Mr. and Mrs. T. G. Borbridge at a dance in the U.F.A. hall tonight (Thursday).

Laurbertus Tabs with his wife and five children have moved onto the Miss Cowling farm south west of town. Mr. Tabs came to Canada from Switzerland in 1928, and has farmed in the Carstairs district for some years.

Keep in mind the School Fair Concert on Friday night in the U.F.A. Hall. A good programme has been prepared by the different schools of the Association. Don't miss it, folks.

CHAUTAUQUA GLEAMS

The latest and hottest tips straight from the horse's mouth, I mean the players line, and here we are:
Ken McCrea says: "Many a man who thought he was a big gun has got 'fired' quickly."
Yes, it's a sad reflection, "Many a boy who is a boon to his mother may be just a baboon to his teacher," cried Margaret Murdoch.

Jimmie Dickson objects to Foreign Countries manufacturing tarran. He thinks it ought to be checked.

"Have you heard that good story about the coffee planter who hadn't a bean. He was badly off" interjected James McClelland.

"What about the perfumer who hadn't a cent" retorted Fred Stevens.

Mrs. Goldie always wears two wrist watches, she likes to have time on her hands.

As a come-back, Fred Baker stated that the three stages of an automobile were, breaking records—breaking down—and broken up.

But the cream of them all, McLean was asked "Are any big men born in Crossfield?" To which he innocently replied "No, just babies." Bert Seville was almost as bad, when asked "what is the equiline?" answered "A French cure for headaches."

Lil Johnson asked me this one "What would a man be doing sitting on a rail road track reading a letter." (Reading between the lines of course. Ed.)

So much for the Black Feather cast. Now for a Busy Honeycomb, and are they busy?

Edith Seville leads the way by stating emphatically "That folks can train themselves to awaken at any desired hour. (Triumph of mind over matter we presume. Ed.)

Les Lennan has taken up pipe smoking as well as boxing, he has to have something to knock out once in a while.

Les Spivey learned to speak "ERSE" in one hour, trouble is we can't understand him neither can the Irish.

Mary Murdoch, claims the gleams are written in a greenhouse, to help force the humour.

Walt Spivey, knows what sword swallows do with their old razor blades, but if he was to tell us, we wouldn't swallow it.

Glen Williams always carries a canteen of water when on a hunting trip. Just a chaser after each shot.

Agnes Williams states that "Dretzel" are just bread that has had a convulsion, while Mabel Young knowingly remarked "A grape fruit is only a lemon that says its opportunity and took it."

Most be some grape fruit that chuckled Hall McCall, "You bet" answered Agnes Fike, "Just wait till you get an eyelid."

Gone Aberdonian, yes, McClelland has, she borrows her sisters shoes, when ever she walks in her sleep.

Flo Cruickshank's cousin is now a detective, even though he spends all day in bed, you see, he is a sort of under cover man.

"Reach for a lucky, and not a Swede" said Gordon Johnson, as the big tough made a grab for him.

Next week all about the four programmes, and as the collector said "My days work is DUN, I'll ring you later folks. Tootle Too.

Church of the Ascension (ANGLICAN)

March 24. Matins... 11.00 a.m.
March 27. Evensong... 8.00 p.m.
March 31. Evensong... 3.00 p.m.
Sunday School every Sunday at 10 a.m.
A. D. CURRIE, Rector.

The Junior U.F.A. card party and dances to have been held in East Community Hall on April 8th has been cancelled.

The dogs of the town and district commenced a three or four days round-up or convention here on Sunday, and in spite of all the police protection we have they (the dogs) were still disturbing the peace of the village on Wednesday.

Among those from Crossfield who took advantage of the excursion to Edmonton over the week-end were: Mr. and Mrs. J. P. Methall, Mrs. R. J. Hendry, Mrs. F. Purvis and Mrs. S. H. McClelland.

What has always been one of the great show places of our village, (W. Spivey's garden) will we venture to state be more so this year, owing to the fact that Walter has embarked on a new venture, that of rearing phantasms.

Last week he received a special consignment of Golden, Silver, Amethyst, and Chinese birds and they will make a grand showing in the new pens Walter has erected for them in the north end of town.

The Directors of East Community Hall have found it necessary to change the price of admission from the usual fifty cents, to fifty cents for gentlemen, and twenty-five cents for ladies. All Suppers will be provided by the Hall.

Letters To The Editor

Madden, Alberta
March 16, 1935
Dear Sir:

I read with interest a letter in which Mr. J. R. Giles objects to a certain paragraph in the report of the Beaver Dam annual meeting. Being myself the guilty party, and as his statements are garbled and misleading I must reply, but, will make it snappy.

First, we are working under conditions that require legal expense, with Mr. Giles permission I will call it uncontrollable expense.

Now let us analyze his figures. He bases his claim of a "drastic" reduction on the statement for 1932, viz. Administration 1932 \$4828 03. This amount was out of all proportion to the conditions of the times, as many ratepayers are willing to testify, it also contains an item of \$550 for assessors salary, which only happens in a dozen years.

Notices that the Sec. Treas. got \$1800 (not \$2000, Mr. Giles) at a time when prices of farm produce were the lowest in the history of Canada. This is the record that can stand the gaff as Mr. Giles states.

The 1933 estimates reflected a policy of retrenchment that was long overdue, but was not by any means, the last word in the art of economy.

The 24 1/2 per cent reduction which Mr. Giles works out from this exorbitant basis is correct. Now let us continue:

Administration 1933..... \$3943.88
Paid Assessor balance due in 1932 350.00
Legal Expenses (uncontrollable) 850.20
Total previous year and legal 1200.00
Controllable Expense for 1933..... 2442.98
Administration 1934..... 3707.07
Paid Assistant on 1933 acct..... 60.00
Legal Expenses (Uncontrollable) 561.30
Total 1933 acct. and uncontrollable..... 621.30
Balance controllable expenses 1934..... 2785.77

Increase as compared with 1933 343.77 (Per cent 14.7.) This does not tally with Mr. Giles' 6.47 per cent. decrease, he uses the figures only and trusts to the ratepayers to overlook the items.

It may appear there is no need to criticise small items but when they cumulate consistently from year to year, it is reasonable ground for comment.

The increase in road work for 1934 of \$4700, which was badly needed, was more than covered by the collection of back taxes of \$6000.

Mr. Giles other figures have no bearing on the present question and no comment is necessary.

In sending in the report I fully realized the implied criticism, which I believe is justified and constructive. I do not propose to allow the public to be misled by half statements by Mr. Giles or anyone else.

Yours truly
F. D. Parker

Closing Out Sale

Starts TUESDAY, MARCH 26th.

Owing to ill health we are forced to relinquish business in Crossfield, after twenty years of pleasant relationships. We appreciate the patronage we have enjoyed during these years and take this opportunity to thank you. We have instructed Sid Willis well known to most of the people of this district to dispose of our stock, he will be pleased to meet the old residents as well as the new comers, and the values he offers on well known and dependable merchandise will be appreciated by you. Everything must go and is priced to move out fast. Act quickly before lines are broken to avoid disappointment. Remember the opening day. Watch for large bills.
